

TylerIce AD SERIES

TRUCK MOUNTED RUNWAY DE-ICER

Featuring advanced technology, our spray system delivers precise and controlled application of anti-icing & de-icing solutions. Our "select-a-spray" system allows you to quickly change from light to heavy applications without removing nozzles.

COMBAT ICY CONDITIONS SWIFTLY AND EFFECTIVELY

Trusted by passenger and cargo airports across the world

Designed to provide safe and exceptional performance in the harshest of conditions, **TylerIce AD Series** is available a wide range of tank capacities - 2,000, 4,000, and 5,000 gallons.

Our units come with spray arms in 3 widths sized for runways - 50, 75 or 100ft widths.

FEATURES

- Tank sizes, including trailers: 1000, 1100, and 2000 gallons
 - 2000, 4000, 5000 for chassis mount
- Safe, low mounted pump station, no crawling between or under booms
- Flow-based control system
- Stainless steel tanks
- 50 - 100' booms
- Truck or trailer mounted
- Product pump capacity of 300 or 600 GPM
- GPS ground speed sensor
- Optional hydraulic Stow/Deploy for the trailer units

FORTBRAND

Truck Mounted Runway De-Icer

- **Mission Control:** Our exclusive **IQAN control system and software** makes controlling all aspects of operations an easy job. Extensive training will not be needed to get and up and running.
- **Driver Side Pumping Station:** The pump station and valve controls are located near the cab on the driver's side. Color coded valves and a mounted operations chart make it simple to perform operations. The load line is located low which is an added safety feature when loading/unloading chemicals.
- **Heavy-Duty Spray Arms:** Constructed of rectangular tubing, the arms are designed to endure heavy usage and exposure to de-icing chemicals, ensuring a long lifespan and reliable performance season after season. Our 50' & 75' arms have a break-away feature.
- **Unrivalled Efficiency:** Our De-Icing Truck Spray Arms are engineered to optimize your de-icing operations with an Auto Stow & Deploy feature. De-icing materials can be sprayed in fully closed, partially open and fully opened positions. Our 50' spray arm has a 3-Section Shut-off while our 75' & 100' spray arms come with a 5-Section Shut-off.
